

Trinity Donor Data Import Process Documentation

Document Version: 1.0

Last Updated: 29.05.2025

Author: Pradyumna Shivanandaiah

Reviewer(s):

Applicable Department(s): Fundraising Team, CRM Team

1. Purpose

To outline the standardized process for importing donor data from Trinity into Dynamics CRM via the Donor Development system.

2. Scope

This document applies to all staff involved in importing trinity donor data into Dynamics CRM, including Fundraising Team and CRM Administrators.

3. Inputs & Outputs

Input	Output
Weekly donor data file (CSV)	Imported donor records in Dynamics CRM
Welcome Call data (CSV)	Updated donor records with welcome call flags
Campaign variables	Pledge records linked to correct campaigns

4. Tools & Systems Involved

1. Shared File Server : Fund > Direct Marketing > 2025 > DMREG > Trinity D2D
2. CRM-BI Portal
3. Trinity Data Cleaning Tool
4. SQL Server: CRMSEVER3, database CRM_MSCRM
5. Import Tool : For Dynamics CRM integration
6. Dynamics CRM Advanced Find View: "Trinity Import Checker"

Overview

This document outlines the end-to-end process for importing donor data from Trinity into Dynamics CRM via the Donor Development system. It includes steps for file preparation, database import, and final data validation within Dynamics.

Step-by-Step Process

[Check Out Visual Reference](#)

Step 1: File Submission by Donor Development

- Action: Donor Development raises a service request.
- File Location: The data file is placed weekly in:

Fund (Shared Server) > Direct Marketing > 2025 > DMREG > Trinity D2D > Data > File Imports

Name	Date modified	Type	Size
Week 2 6-11 January	14/01/2025 15:13	File folder	
Week 3 13-18 January	22/01/2025 14:31	File folder	
Week 4 20-25 January	29/01/2025 12:07	File folder	
Week 5 27 Jan - 1 Feb	05/02/2025 15:24	File folder	
Week 6 3-8 Feb	11/02/2025 09:11	File folder	

Step 2: Data Cleaning

- Action: Use the Trinity Data Cleaning Tools to clean and prepare the data for import.
- Output: A processed CSV file ready for further use.

2.1 About Trinity Data Cleaning Tool

The Trinity Data Cleaning Tool is a Flask-based local application that validates and cleans Excel files containing Trinity records. It automates error detection, provides suggested fixes, and allows manual review to ensure data integrity. Designed for secure, offline use, it prepares clean, standardized datasets for reporting, compliance, or system integration.

2.1.1: Open the Flask Application Folder

1. Navigate to the folder where the Flask application is stored.

2. Right-click on the folder and select Open in Terminal (or equivalent based on your operating system).

Example Path: C:\user\Project\Data-Preparation-Trinity\V6

2.1.2: Start the Flask Application

In the terminal, enter the following command to start the Flask application:

```
py app.py
```

- Note: Ensure that Python is installed and accessible in your terminal.
- The terminal will display output similar to the following:

```
* Serving Flask app 'app'
* Debug mode: off
INFO:werkzeug:WARNING: This is a development server. Do not use it in a production
deployment. Use a production WSGI server instead.
* Running on all addresses (0.0.0.0)
* Running on http://127.0.0.1:8000
* Running on http://172.16.0.2:8000
INFO:werkzeug:Press CTRL+C to quit
```

```
Windows PowerShell
PS C:\Pradyumna\Project\Data-Preparation-Trinity\V6> py app.py
* Serving Flask app 'app'
* Debug mode: off
INFO:werkzeug:WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on all addresses (0.0.0.0)
* Running on http://127.0.0.1:8000
* Running on http://172.16.0.2:8000
INFO:werkzeug:Press CTRL+C to quit
INFO:werkzeug:127.0.0.1 - - [27/May/2025 16:11:17] "GET / HTTP/1.1" 200 -
```

2.1.3: Access the Validation Portal

1. Open a web browser.
2. Enter one of the URLs displayed in the terminal:

<http://127.0.0.1:8000>
<http://172.16.0.2:8000>

3. The Data Validation Portal will open.

2.1.4: Upload the Excel File

1. On the Data Validation Portal, locate the section for uploading the Excel file.
2. Click the Choose file button and select the Excel file containing Trinity records.

3. If the Excel file is encrypted, enter the password in the File Password (if encrypted) field.

2.1.5: Validate the File

1. After selecting the file and entering the password (if applicable), click the Validate File button.
2. The tool will process the file and perform all predefined validations.

2.1.6: Review Validation Results

1. Once the validation is complete, the Validation Results page will display:

Type	Indicates the type of error (e.g., Structure, Validation).	
Row	The row number where the error occurred.	
Field	The column or field name where the error was found.	
Error Reason	A description of the issue.	
Current Value	The value currently in the file.	
Corrected Value	Suggested correction (if applicable).	
Action	Options to Ignore or fix the error.	

Validation Results for Week_10_Import_File-Master_File.xls

Type	Row	Field	Error Reason	Current Value	Corrected Value	Action
Structure	-	-	Missing columns: Welcome Call, Channel. Suggestion: Add these columns to your file.	-	No input required for structural errors.	
Validation	281	IBAN	Invalid IBAN format: IE07IPBS99064352495842aa	IE07IPBS99064352495842aa	IE07IPBS99064352495842aa	Ignore
Validation	281	Eircode	Invalid Eircode format: PP1209DO (expected format: A11 AA11)	PP1209DO	PP1209DO	Ignore
Validation	281	District	Invalid District: Malway (not found in database)	Malway	Malway	Ignore

[Apply Fixes & Download](#) [Back to Upload](#)

Validation Rules in Trinity Data Cleaning Tool with Common Fix:

Validation Type	Field	Error Message Sample	Example Invalid Input	Suggested Fix
Structure	Any	Missing columns: Welcome Call	Column missing	Add the column
Structure	Any	Unexpected columns found: Middle Name	Extra column	Remove the column
Validation	IBAN	Invalid IBAN format: DE89370400440547798673	German IBAN	Use IE29AIBK93603312345678 or ignore
Validation	BIC	Invalid BIC format: ABCD1234	Short BIC	Use AIBKIE2D
Validation	Date	Invalid date format: 12/05/1990	DD/MM/YYYY	Use 1990-05-12
Validation	Date	Missing date value	Blank cell	Enter valid date
Validation	Opt-In	Invalid opt-in value: Yes	'Yes'	Use '1' or '0'
Validation	Eircode	Invalid Eircode format: Dublin 4	Text address	Use D02 X009
Validation	District	Invalid District: Atlantis	Unknown name	Use valid CRM district

2.1.7: Apply Fixes or Ignore Errors

1. For each error:

- If the suggested Corrected Value is accurate, leave it as is.
- If the error should be ignored, click the Ignore button

2. After reviewing all errors:

- Click the Apply Fixes & Download button to apply all corrections and download the cleaned file.
- Alternatively, click Back to Upload to re-upload the file or make changes.

Validation Results for Week_10_Import_File-Master_File.xls

Type	Row	Field	Error Reason	Current Value	Corrected Value	Action
Structure	-	-	Missing columns: Welcome Call, Channel. Suggestion: Add these columns to your file.	-	No input required for structural errors.	
Validation	281	IBAN	Invalid IBAN format: IE07IPBS99064352495842aa	IE07IPBS99064352495842aa	IE07IPBS99064352495842aa	<button>Ignore</button>
Validation	281	Eircode	Invalid Eircode format: PP1209DO (expected format: A11 AA11)	PP1209DO	PP1209DO	<button>Ignore</button>
Validation	281	District	Invalid District: Malway (not found in database)	Malway	Malway	<button>Ignore</button>

Apply Fixes & Download
Back to Upload

2.1.8: Download the Cleaned File

1. After applying fixes, the tool will generate a cleaned version of the Excel file.
2. Download the file for further use.

3: Create Welcome Call Import File

- Action: Extract the following columns into a new CSV file named **Welcome_Call_Import.csv**:

Trinity Reference	Welcome Call	Channel
-------------------	--------------	---------

- Note : Remove the "Welcome Call" and "Channel" columns from the main processed CSV file after extraction.

4: Save as CSV with Correct Date Format

- Action : Ensure all date fields are formatted as **DD/MM/YYYY** (e.g., **02/04/2025**).
- Save As : **.csv** format

5: Replace Existing Pledge Import File

Location:

- Current File: **Pledge_Import**
- Action:
 - Rename the existing file using the format: **Pledge_Import_yyyyMMdd**
 - Move the renamed file to the **Completed** folder.

- Place the new file in the same location as **Pledge_Import.csv**.

Important: Opening and saving the file again may alter date formats. Always double-check before proceeding.

6: Run Pledge Import in CRM-BI Portal

CRM-BI : Open the CRM Portal → Dynamics → CRM → Pledges → Imports

6.1: Run “1 FR Pledge Import”

- Purpose: Adds records to the **dbo.ext_FR_PLEDGE_IMPORT** table in the **CRM_MSCRM** database on **CRMSERVER3**.

```
SELECT * FROM dbo.ext_FR_PLEDGE_IMPORT WHERE processed_date IS NULL
```

Note: Only run this once. If reopened, ensure the file is closed before running again.

6.2: Error Handling (Optional)

Location:

```
CRM-BI\PBIX > Integration Services Catalogs > SSISDB > IS_CRM_Pledge
```

- Job Name: **1.5 FR Pledge Check**
- Action: Review any errors returned during the import process.

6.3: Confirm Successful Insert

- At this point, data should be successfully inserted into the database.
- Next steps will import the data into Dynamics CRM.

Runtime	Description
21/06/2019 11:07:56	The FR Pledge Import job has completed. Please close this window.

ID	DP CODE	DP DATE	DP NAME	LOG DESC	LOG VALUE	LOG DATE	LOG USER
509	312	21/06/2019 00:00:00	FR Pledge Import	Pledge records inserted into staging	35	21/06/2019 11:07:53	sa

7: Validate and Import Using ImportTool

- Definition File Path:

\\server07\CRM\Development\ImportTool\ImportTool Projects\Pledge and Standing Order Imports

> Network > server07 > CRM > Development > ImportTool > ImportTool Projects > Pledge and Standing Order Imports				
	Name	Date modified	Type	Size
	missing pledge import temp	17/05/2024 13:33	DPS Import Project	10 KB
	Pledge Import - Contacts No Email	06/02/2025 12:02	DPS Import Project	40 KB
	Pledge Import - Contacts With Email	06/02/2025 12:01	DPS Import Project	40 KB
	Pledge_Import	23/05/2024 13:09	Microsoft Excel Co...	107 KB

7.1: Validate (Test Mode)

- Action:

Click Validate (1).

Ensure Test Only (2) is selected.

Click Start (3).

- Log Review:
 - Check logs for major errors (minor errors like duplicate emails may occur).
 - Note any duplicates for manual resolution by the relevant team.

The validation process might take some time. Once it is complete, you need to copy the generated logs and perform a surface-level check for any major errors. Since the data has already been processed by the tools, the likelihood of data errors is very low.

One minor issue you might encounter is the duplication of records. This typically occurs when a user has the same email address associated with one or more contacts in the Dynamics system. You can ignore this at this stage, but make sure to note these instances. The concerned team will need to manually resolve them.

Once testing is complete, follow the same process. However, this time, ensure that the **"Test Only"** option is **unchecked**, then click **"Import"** and finally click **"Start"**.

7.2: Final Import

- Action:
 - Repeat the above process without selecting Test Only.
 - Click Import and then Start.

7.3: Run Both Definition Files

1. Pledge Import – Contacts Without Email
2. Pledge Import – Contacts With Email

8: Update Import in CRM-BI Portal

After successful import:

8.1: Run “2 FR Pledge Import Update 1 (Mandate)”

- Action: Select Yes – Update Now, click View Report Once, and then View Report

8.2: Run “3 FR Pledge Import Update 2 (Campaign)”

- Action:
 - Select appropriate campaign variables used in the file.
 - Click Yes – Import Now, then View Report Once and View Report.

3 FR Pledge Import Update 2 (Campaign)

Run FR Pledge Import Final

☐ No - do not import ☒ Yes import now (Click View Report once)

Trinity ICS Store Pledges

Agency	Trinity Marketing
Appeal	Generic Appeal
Channel	Private Sites
Cost Centre	Direct Marketing – Regular Givers
Campaign	‘Trinity Recruitment Campaign’ for current year
Fund	Unrestricted

Note: Confirm campaign name with FR (Fundraising) team if unsure.

8.3: Run “4 FR Pledge Import Final”

- Action: Click Yes – Import Now, then View Report Once and View Report.

Step 9: Import Welcome Call Data

- File Used: **Welcome_Call_Import.csv** created in Step 3.

Definition File

```
\\server07\CRM\Development\ImportTool\ImportTool Projects\Pledge and Standing Order Imports\Trinity Welcome Call Import
```

Step 9.1: Validate (Test Mode)

- Follow the same test process as in Step 7.1.

Step 9.2: Final Import

- Follow the same import process as in Step 7.2.

Note: All channels should be set to Private Sites during this import.

Step 10: Cross-Check Import Results

- Action: Use the Advanced Find View in Dynamics CRM.
- Name: **Trinity Import Checker**
- Purpose: Verify that all records have been imported correctly.

Select below fields in the advance view field and hit Results

Advanced Find - Microsoft Dynamics 365 - Work - Microsoft Edge

End of Process

You have now successfully completed the Trinity import process into Dynamics CRM.

8. Error Handling & Troubleshooting

This section outlines common errors, their root causes, and recommended corrective actions during the Trinity donor data import process.

8.1 Common Errors During File Preparation

Issue	Cause	Resolution
Incorrect date format in CSV	Re-opening/saving the file after initial creation can alter date formats	Ensure all date fields are formatted as DD/MM/YYYY before saving. Avoid re-opening or editing the file unnecessarily.
Missing required columns (e.g., Trinity Reference)	Data cleaning step missed a required field	Double-check that all mandatory fields for import are present (e.g., Trinity Reference, Welcome Call, Channel)
CSV encoding issues	Incorrect encoding when saving the file	Save the CSV using UTF-8 or Windows (ANSI) encoding depending on system compatibility

8.2 Errors During SQL Import (CRM-BI Portal)

Issue	Cause	Resolution
SQL import job fails or returns error	Connection issues, incorrect permissions, or malformed data	Check job 1.5 FR Pledge Check under Integration Services Catalogs > SSISDB > IS_CRM_Pledge to review error logs
No records inserted into `ext_FR_PLEDGE_IMPORT` table	Empty or invalid input file	Run: <code>SELECT * FROM dbo.ext_FR_PLEDGE_IMPORT WHERE processed_date IS NULL</code> to verify if records were added
Stuck or hanging import process	Large file size or server timeout	Break large files into smaller batches or contact IT for performance tuning

8.3 Errors During ImportTool Execution

Issue	Cause	Resolution
Duplicate email detected	Email already exists in Dynamics CRM	Log duplicates and notify the relevant team (e.g., Donor Development or CRM Admin) for manual resolution
Validation fails with “Field not found” or “Invalid mapping”	Definition file doesn’t match current CSV structure	Review and update the ImportTool definition file to reflect current column names and mappings
ImportTool crashes or freezes	Insufficient memory or corrupted definition file	Restart the tool, check system resources, or restore from a known working definition file

8.4 Issues After Importing into Dynamics CRM

Issue	Cause	Resolution
Welcome Call or Channel fields not updated correctly	Mapping mismatch in ImportTool definition	Verify that Trinity Reference matches exactly and channel is set to “Private Sites”
Pledges not linked to correct campaign	Campaign name mismatch or incorrect variable selection	Confirm campaign name with FR team and ensure it matches the exact spelling used in CRM
Data missing in “Trinity Import Checker” view	Import failed silently or record not matched	Use Advanced Find to manually search for imported Trinity References or use SQL query to validate database insertion

8.5 General System or Access Issues

Issue	Cause	Resolution
Cannot access shared folder (` \\CRM-BI\DonorDev`)	Missing permissions or network connectivity	Contact IT or system administrator to grant access or resolve connection issues
Unable to open CRM-BI Portal or Dynamics CRM	Browser compatibility, expired credentials, or portal downtime	Clear browser cache, try alternate browser, or contact support
Definition file path not found or inaccessible	Moved/renamed file or lack of access rights	Verify file location or contact CRM Admin to restore/relink

8.6 Frequently Asked Questions (FAQ)

Q: What if the Excel file is not encrypted?

A: Simply skip the File Password (if encrypted) field and proceed with uploading the file.

Q: Can I ignore all errors?

A: Yes but ignoring errors may result in incomplete or incorrect data. It’s recommended to review each error before deciding to ignore it.

Q: Why am I getting a warning about the development server?

A: The warning indicates that the Flask application is running in development mode. This is normal.

Q: How do I stop the Flask application?

A: Press **CTRL+C** in the terminal to stop the application.

9. Appendices

9.1 Appendix A – Key File Paths

Description	File Path
Source File Upload Folder	Fund > Direct Marketing > 2025 > DMREG > Trinity D2D > Data > File Imports
Pledge Import File Folder	\\CRM-BI\DonorDev
